

John Allen Culley

Computer science major with a passion for learning how to use code within a corporate environment. Interested in broadening knowledge within the fields of software development and machine learning. Short-term goal is to specifically work within a team of professional software developers to learn how to build code for products that a company desires.

FIELD RELATED PROJECTS

NaturalNumber Calculator – Reverse Polish Notation calculator with an MVC GUI. A NaturalNumber object was used so there would be no bounds on the size of numbers used within the program

RSS Feed Aggregator – reads an XML file with RSS news feeds and collects the publish date, source, and link and outputs all feed data into a table with hyperlinks to the article and source

WORK EXPERIENCE

Willow Brook Christian Communities: Delaware, OH — *Restaurant Server*

February 2018 - June 2020

Trained new employees, took orders, prepared plates, tended to the residents, and bussed tables. Built relationships with the residents and catered to their likes and dislikes.

Free Lance Construction, Delaware and Sunbury, OH

June 2020 - August 2020

Worked at various homes for various homeowners completing projects such as painting, landscaping, and land clearing.
